Travellers Choice empowers members with new TC Hub

Technology solution makes it easy for agents to access support services and compare preferred products

21 November 2016: **Travellers Choice is making it even easier for members to support its stable of preferred partners with the release today of TC Hub – a new extranet solution that allows agents to compare side-by-side the key elements of preferred suppliers' offerings, including products, commission levels and incentives.**

Unveiled at the retail group's Annual Shareholders' Conference in Canberra, TC Hub uses the same technology platform behind the retail network's innovative Site Builder websites, enabling intuitive navigation, optimisation for mobile devices and advanced search functionality.

A key component of the extranet is the group's new Preferred Supplier Directory, which members can interrogate using a variety of search terms, such as 'name', 'product type' or 'destination'.

Each relevant company's details – including products, prices, commissions, incentives and preferred category level – are then displayed side-by-side, allowing agents to quickly and easily compare results.

TC Hub also offers Travellers Choice members information on the group's extensive member services, along with corporate news and links to TC EXELL, an eLearning library where members can access a growing selection of online training materials from preferred partners.

General Manager Sales Nicola Strudwick says TC Hub is ultimately designed to help members get the maximum value from their Travellers Choice membership.

"It's about ensuring Travellers Choice members fully understand the extraordinary range of products and support services available to them," says Strudwick. "They can then make informed decisions that benefit their individual businesses and the company as a whole."
